

KÖNIGSBERGER BRIDGES INSTITUTE

KÖNIGSBERGER BRIDGES INSTITUTE

Compete. Learn. Certify. Build.

ONE COMMUNITY ONE MISSION

*In 1736, Euler **solved an impossible problem** and **invented an entirely new field of mathematics.***

We've been doing the same thing with students ever since.

Named after the Königsberger Bridges Problem, also known as the Seven Bridges of Königsberg, KBI is an EU nonprofit, empowering students to explore emerging technologies from first principles through hands-on, real-world learning.

We bring together students, practitioners, researchers, and industry leaders across 35+ countries to do what most institutions don't — connect rigorous thinking with real-world application, from day one.

By connecting theory with application, KBI challenges young innovators to tackle real-world problems using technology as a tool for sustainable impact and global progress.

**TECHNOLOGY IS A TOOL
IMPACT IS THE GOAL**

OUR WORK

EMERGING TECHNOLOGIES OLYMPIAD (ETO)

Annual global competitions where student teams design and defend full solutions to UN SDG-aligned challenges — judged on innovation, ethics, scalability, and real-world impact.

It comprised of:

- International Blockchain Olympiad (IBCO)
- International Data Science Olympiad (IDSO)
- International Quantum Computing Olympiad (IQCO)

Open to secondary and tertiary students worldwide.

TRAINING WORKSHOPS

Hands-on learning programmes in BCTT, DSAI, and QCIT — taught from first principles and applied to real-world problems from day one. For students who want to explore before they compete — and practitioners who want to stay sharp.

CERTIFICATION PROGRAMMES

KBI's certification tracks formally recognise demonstrated competency in emerging technology domains — going beyond participation to verifiable, portable credentials.

PROJECT SUPPORT

KBI supports student teams in taking their ideas beyond the competition stage — through mentorship, startup support, etc. Past projects have been adopted as proof-of-concepts with KBI's industry and academic partners.

WORKING & RESEARCH GROUP

For those who want to go deeper — KBI's working groups and research initiatives bring together students, academics, and practitioners to investigate emerging technology challenges that go beyond any single competition cycle.

城大商学院
College of Business
CUHK 城市大学商学院

at University of Hong Kong
Research Centre for Asia-Pacific New-Road
城大亚太新丝路研究中心

SOCRATIC CIRCLE

KBI's Socratic Circles are facilitated discussions where students, practitioners, and thinkers come together to interrogate ideas — not just present them. Open to students, practitioners, and community members at all levels.

KBI COMMUNITY GATHERING

Beyond competitions and coursework, KBI brings its global community together through regular events, meetups, and collaborative sessions. Because the best ideas don't always happen in competition halls — sometimes they happen over a conversation.

KÖNIGSBERGER BRIDGES INSTITUTE

GET INVOLVED

Whether you're a student ready to compete, an institution looking to partner, or simply curious about what we do — we'd love to hear from you!

WHERE DO YOU FIT?

FOR STUDENT

You don't need to be a coder. You need to be curious, collaborative, and willing to tackle real problems.

You can:

- Compete in ETO 2026
- Join a learning programme
- Take part in the KBI community

Open to secondary and tertiary students globally

FOR CORPORATE PARTNERS

Work with KBI to develop the next generation of emerging technology talent — directly aligned with your industry's real challenges.

Connect with KBI's global network of high-performing graduates for internship and graduate hiring pathways

Associate your organisation with rigorous, ethical, and impactful technology education at a global level

FOR ACADEMIC INSTITUTIONS

KBI extends what happens inside the classroom — giving your students a global stage and your institution a connection to the world's emerging technology community.

You can:

- Bring ETO to your campus as an official host institution
- KBI Curriculum Integration into Your Existing Courses
- Research Collaboration
- Student Pathway Beyond Just Learning

OUR IMPACT

35+

Participating Countries

10000+

Participants Per Year

8+

Years of Running

From East Asia to Europe to the Americas, KBI participants have produced solutions addressing food security, healthcare access, labour rights, climate resilience, and financial inclusion.

COMMUNITY SUCCESS

SAKIB RABBANI

UNIMATRIX, IBCOL 2021

Sakib came to KBI as a student with an idea and left with something more valuable than a trophy: the industry connections that lead to a role at JP Morgan Chase HK.

OSCAR SO

DECENTRALIZED IDENTITY WALLET (IBCOL 2019)

Through IBCOL, Oscar gained real-world blockchain expertise and valuable connections, paving the way for his current career at Facebook (Meta).

ANH LE

REAL ESTATE VERIFICATION PROCESS (IDSOL 2019)

Anh, a University of Waterloo alumna, sharpened her data science expertise through her participation as a IDSOL 2019 finalist, inspiring her to pursue a career as a Data Scientist at Lyft.
